Have Your Way

Superheist

Tall tales shattered
Pristine images of me
Nurtured sadness
It's all beautiful to seeWe can't mix themFlauntless glories
Amplified to graduate
Constant beatings
A bruise underneath your faceCreeping skywards
I don't understand your ways
Silence broken
It's all beautiful to meWe can't mix themIt's more than you take
It's more than you break
It's more than you can
It's more than I am to understandCome and have your way
Don't take too long
Come and have your way
Don't take too longA vision to pray, too far away
Emotions are plain today
Come and have your way
Don't take too longRazored mirrors
Wells been empty for so long
Climate changes
But it only rains on meWe can't mix themIt's more than you take
It's more than you break
It's more than you can
Its more than I am to understandCome and have your way
Don't take too long
Come and have your way
Don't take too longA vision to pray, too far away
Emotions are plain today
Come and have your way
Don't take too longDon't take too long
Don't take too long
Don't take too long
Don't take too longIt's more than you can take
It's more than you can break
It's more than I can understand
It's more than I can understand
