

Miracles (Mega Is a Gang Remix)

Newsboys

You ever seen a brother or sister who could cure a disease
I hadn't but I wanted to
Show the world that nothing's impossible if they can believe
They're gonna see a miracle I didn't know what to do
So I went running to you
To find that cure
Now I know for sure...I'm done looking around
I finally figured it out
It's more than metaphysical You got me up from down
Faith has shattered my doubts
I believe in miracles I knew what I wanted to do but just like gravity's pull
I always did the opposite Life was a meaningless party
I started to fall into a bottomless hole
But then I got a miracle Some people don't have a clue
If all of this could be true
But take a look at me
I was blind but now I see I'm done looking around
I finally figured it out
It's more than metaphysical You got me up from down
Faith has shattered my doubts
I believe in miracles There's something that's missing
If we can't recognize
That our own existence
Is the miracle before our eyes I'm done looking around
I finally figured it out
It's more than metaphysical You got me up from down
Faith has shattered my doubts
I believe in miracles I'm done looking around
I finally figured it out
It's more than metaphysical You got me up from down
Faith has shattered my doubts
I believe in miracles It's more than metaphysical
