

Can't Leave You Alone

Brian McKnight

Irresistible, nothin' like I've ever known
I give you my time, I give you my all, I give you my money
Girl you're so incredible, nothin' like I've ever seen
I give you what you want, you give me what I need, girl it's funny You got the thing I'm waitin' for
You've got me wanting more and more
You've got me so wide open
Don't tease me girl, can't leave you alone All the freaky stuff you do, I can't get enough of you
Wait till I get home, can't leave you alone
It's hard to stay away from you, I just want to play with you
Baby, all I know is I can't leave you alone Yeah, don't come around here, legs cocked in the air
If you ain't tryin' to toss it up, girl
I'ma tell you what I want, real plain, real work
Throw it back, I ain't lost my touch, girl Bet'cha man can't do it like that, what strengths needed
When I'm attackin' with black cat, slackin' a fat back
Packin' a lot with you a little, so quit splashin' us Girl it's unbelievable, never thought I'd be this way
Whenever we're apart, don't know where to start
Got me catchin' feelings
Doing things I never do, sayin' things I never say
The code to my safe, the key to my crib, got me on the ceilin' You got the thing I been waitin' for
You've got me wanting more and more
You've got me so wide open
Don't tease me girl, can't leave you alone All the freaky stuff you do, I can't get enough of you
Wait till I get home, can't leave you alone
It's hard to stay away from you, I just want to play with you
Baby, all I know is I can't leave you alone, can't leave you alone
Baby, all I know is I can't leave you alone Look girl, little kiss no slip
Just me slippin' in and out of your room and press that
Me slippin' in and out of your womb, I might just
Pull it out there, put it right back, never mind that, what'chu likin'
We'll tickle and then playin' with the pipe Get busy like I'm stayin' for the night
You did layin' with a nice man goin' bad
You talk like you're meetin' but you can't
If I stop you may get to steppin' with a man And nah, I ain't braggin'
But sometimes you can throw your thing in the air
And it'll turn into sunshine that can add to your punchline
That's all I need a good mag packed in a lunch line
Lay your cards you could stunt right, might as well let me hump right You got the thing I been waitin' for
You've got me wanting more and more
You've got me so wide open

Don't tease me girl, can't leave you alone
All the freaky stuff you do, I can't get enough of you
Wait till I get home, can't leave you alone
It's hard to stay away from you, I just want to play with you
Baby, all I know is I can't leave you alone
All the freaky stuff you do, I can't get enough of you
Wait till I get home, can't leave you alone
It's hard to stay away from you, I just want to play with you
Baby, all I know is I can't leave you alone
Can't leave you alone, can't leave you alone
Can't leave you alone, can't leave you alone
Baby all I know is I can't leave you alone
