

# Call to Action

## Live Fast Die Fast

[Copper cover]What we need's a call to action

Display it in your coldest caption

What we need's a call to action

So long to what could never heal

So long to your distant memory

So long to what could never be

You build me up to break me down again

You kill me once you kill me every time

Your disbelief it keeps me waiting in line

I don't believe you're dull reaction

What we need's a call to action

Display it in your coldest caption

What we need's a call to action

So long to all your remedies

So long to your desperate misery

So long to what you think of me

You kill me once you kill me every time

Your disbelief it keeps me waiting in line

I don't believe you're dull reaction

What we need's a call to action

Display it in your coldest caption

What we need's a call to action

You kill me once you kill me every time

(Action)

Waiting in line, waiting in line

(Action)

[x2]I don't believe you're dull reaction

What we need's a call to action

Display it in your coldest caption

What we need's a call to action

And at this moment I'm standing forward

(Action)

I've tried it your way so how do you like me now?

Like me now

How do you like me now?
