When I'm Not Around

Junior Boys

checkwhen the day is over
where could you be
do you look past the lights and
think where is he
when im not around
how can you relate
to the night in front of you
and the things we never saysometimes alone
in the club where i met you
my feels seem cruel
but i never regret you
when im not around
will you let me know
keep me on my game
don't let your feelings showit seems i disappear
im really right behind
through the streets im always near
right through the edge of nightthere's that look that you give
when there's a light on the floor
the haze of countless nights
is coming in through the door
when im not around
who do you revive
what name is on your mind
when the morning comes aliveit seems i disappear
im really right behind
through the streets im always near
right through the edge of nightit seems i disappear
im really right behind
through the streets i keep you near
right through the edge of night
come on i'll take you home
you've been out way to long
then we should stay at home
i think i'll know you tonight
