Intermission to the Moon

A Dream Too Late

Please, hear me call out loud
Hear me scream this out
It's the only thing you'll hearIn a town so cold, in a figured soul
You will figure out when you hearSpace is all you've gotYou really only get one chance
You really only get one love
You really only get one fear to fallIf you wanna go alone
Then it's all on you
And the ghosts controlHere, with your fingers cold
And the shades of roads
That won't take you homeYou really only get one chance
You really only get one love
You really only get one fear to fallYou really only get one wish
You really only get one life
You really only get one time to flySpace is all you've got
Space is all you've gotYou really only get one chance
You really only get one love
You really only get one fear to fallYou really only get one wish
You really only get one life
You really only get one time to flyTo fly
