

Sick And Tired

Outbreak

Another day, nothing new, another day I fucking blew. Everything's wrong, but I'll fake a smile, I'll say it's fine but I'm in denial. I need a change, I need it fast, cause if things don't change then I won't last. Sick and tired and time is wasting, another pointless day I'm facing. It's a fucked up world and people are the same, they don't care and they'll never change. I've had enough, I gotta get away, I need a fucking change today. Another day, nothing new, another day I fucking blew. Another fucking day.
