

# The Other Side

## Morphine

Going down to the river, there's a man I wanna see  
Yeah, he's the ferryman, he'll recognize me  
I'm going down now to the riverside  
There's a place I wanna be I'm going to talk to the ferryman  
He'll be expecting me  
I'm crossing over now to the other side  
Life is better there on the other side The grass is greener there on the other side  
And I I get even there on the other side  
And everything will turn out all right  
On the other side I'm crossing over now to the other side  
The other side  
I walked by the church house late last night  
Yea I walked by the church house but I didn't go inside Cause I I once slept with the preacher's wife  
She handed me a ticket to the other side  
I'm crossing over now to the other side  
To the other side
