

# The Machine's Breaking Down

**Tina Arena**

Proven patterns breaking down  
All controls gone underground  
We should have never come to this  
Yet here we stand  
Devoid of optimistsThe machine's breaking down  
The machine's breaking down  
The machine's breaking down  
We set the wheels in motion  
Now we're caught in the commotion  
The machine's breaking downLebanon Iraq Iran  
Ethiopia and Afghanistan  
Religion and politics, plunder and rape  
While the weak cow down  
And pray for escapeThe machine's breaking down  
The machine's breaking down  
The machine's breaking down  
We set the wheels in motion  
Now we're caught in the commotion  
The machine's breaking downAddicts bent on self-destruction  
A billion dollars for the masters of seduction  
Despair and hope go hand in hand  
Charting the inevitable course of man  
Bloody images bounce off the wall  
As the satellite pictures tell it all  
While common goals and common ground  
Disappear as the world breaks downThe machine's breaking down  
The machine's breaking down  
The machine's breaking down  
We set the wheels in motion  
Now we're caught in the commotion  
The machine's breaking downThe machine's breaking down  
The machine's breaking down  
The machine's breaking down  
The machine's breaking down  
(Repeat to fade)
