If You've Never Been In Love With Anything

Embrace

Throw me a line and I'll bring you the hook that caught me
You reel me in to where I cannot breathe
Throw me back and jump in after meIt's happened before but I'll see you're never betrayed
No wrongs to cure or fears to beat away
And though I'll run, I'll never run awayI know you think that we're all the same
And you say that you'll love when love comes your way
But today, we've both got time to spend, not wasteIf you've never been in love with anything, why do you stop it now?
It's happening and though you know it now
You won't admit you've ever been in love with anythingNever before have I had somebody so close
I'm lying here wondering why you let me go
You drive your life like it's a car you stoleYou need to be told that you can only live the one life
Forever starts before the day you die
If it get hard, just take it in your strideIf you could see the bad in yourself
When you see all the bad in everyone else and in me
You wouldn't need to run away
