Calm Down

Manila Under Fire

We are means to no end
Forced to walk the streets they defend
And our eyes lose focus with no ground to hold us
Trapped in the light of a lie

Faster beats and paces where you run
Broken hearts and faces now you're done
Now stay still and

Calm Down
Breathe in Deep
Calm Down
Will you still the raging seas
The world is so much clearer when you shade it black and white
Wash away the colours of your mind

This place is a bothering sight
And you take flight with the flies
Temptation is burning
A thought overwhelming
Anger takes over the night

Faster beats and paces where you run
Broken hearts and faces now you're done
Now stay still and

Calm Down
Breathe in Deep
Calm Down
will you still the raging seas
the world is so much clearer when you shade it black and white
wash away the colours of your mind

Wash away the colours

Calm Down
Breathe in Deep
Calm Down
will you still the raging seas
the world is so much clearer when you shade it black and white

wash away the colours of your mind
