Open All Night

Marc Almond

Don't reject me, don't send me away
Don't ever let me down
Be my torch and burn for me
I need a little of your starlightThere's a black hole in my heart eating all the love
A demon in my heart who'll never get enoughSo unlock your soul and turn on your neon light
Keep your heart open all night, open all night
Unlock your soul and turn on your neon light
Keep your heart open all night, open all nightI'm with the lost leading the lonely
Whose for another tortured soul
Be the saint to whom I pray
To make me wholeBe the shoulder where I cry a bed for me to die
And angel come to save me the only one who ever forgave meSo unlock your soul and turn on your neon light
Keep your heart open all night, open all night
Unlock your soul and turn on your neon light
Keep your heart open all night, open all night, open all nightTurn on the neon that you call your heart
Short stay for rent until I depart
Always a vacancy safe and warm
Always a port in a stormThere's a black hole in my heart eating all the love
A demon in my heart who'll never get enoughSo unlock your soul and turn on your neon light
Keep your heart open all night, open all night
Unlock your soul and turn on your neon light
Keep your heart open all night, open all night'Cause I'm an erotic neurotic I need a little antibiotic
'Cause I've got a sickness in my soul
I'm an erotic neurotic I need a little antibiotic
'Cause I've got a sickness in my soulGive me a moment of dedication a few little prayers
And some medication stay open all night
Give me a moment of dedication a few little prayers
And some medication stay open all nightSoul for sale who want a heart for rent
Open all night, open all night
Keep your heart open all night
Keep your heart open all night
