

Just Can't Leave It Alone

Hyper Static Union

(Chorus:)

I just can't leave it alone

(I've got to sing a song of my redemption)

I just can't leave it alone

(I've left that old life behind)

I just can't leave it alone

(Oooh, this funky light of my salvation)

I just can't leave it alone

(I've got to let it shine) They won't shut me up

They ain't gonna put me down

They thing they've had enough

I just can't leave it alone (Chorus) His love's an ocean and we're going under

To the bottom of the sea

Waves will crash against the rocks like thunder

And they're beckoning to me

They won't shut me up

They ain't gonna put me down

They thing they've had enough

I just can't leave it alone Ooooh, I just can't leave it, I just can't leave it

I just can't leave it alone His love's an ocean and we're going under

To the bottom of the sea

Waves will crash against the rocks like thunder

And they're beckoning to me
