Just What the Doctor Ordered

Ted Nugent

I got my guitar when I was 10 years old Found a love in rock an' roll Now I'm on the verge of a nervous breakdown I'm gonna give my body and soulIt's so crazy But you know that I like it I've found a cure for my body and soul I've got me an overdose of rock and rollI jammed everyday I jammed everynight I practiced till I knew all the licks Now I'm on the verge of a nervous breakdown I don't know the meaning of quitIt's so crazy Yes you know, but I like it It crushes my head, my brain is on the border But this is what the doctor ordered Yes, it is I jammed everyday I jammed every night I practiced till I knew all the licks Now I'm on the verge of a nervous breakdown I don't know the meaning of quitIt's so crazy But I like it It crushes my head, my brain is on the border But this is what the doctor ordered
