

Unstoppable

Twiztid

[Monoxide:]

I don't think that anybody really wanna get inside of my twiztid mind
So sick your never gonna find something
Like it like me like this like mine
Like out of the ordinary
I want more to bury
Full of more gore
Than a chopped up whore
Make a tortured porn
In a middle of a mortuary
Nothing left but the bones to carry
Put a bunch of holes in your capillary
Anybody claiming I'm an adversary
I don't give a fuck if the cops pull up with shotguns out and their sirens blarin'
Don't wanna get it scary
I'm very
Until the dead rocking in the cemetery
Since I was a barely a little kid
Been waiting for the brighter day
So they can take it all away
Well we got sick & a made a little family
With a name & grain with a sanity
Bigger tragedy
To a fucked up galaxy
Consumed by so many little bitty fallacies
Gotta find another way to get up out of the hell that their handing me
Unstoppable like an HIV
In your arteries make it hard to breath
Like a hand around your neck & I start to squeeze
And all I wanna do is bring em' all to knees
They wanna make it hard for me
In a land of apologies
In a hard days anything more than a shut front door with a sign says
"Please don't bother me"

[Chorus:]

I can reach for the stars but I'll end up down here
No matter what it takes
Ima still keep on fighting I'm unstoppable till' my last breath & my heart stops beating

I will never give up on me again
No matter how rough
& no matter how much shit this life can shovel in my path Ima still be all ok

[Madrox:]

Cause' they label me abomination
The whole world is destined to hate me
So I can only bottle up for so damn long
Before the glass starts to crack & I over flow
'Cause I'm over the line
And I'm out my mind
Never like to deliver when it should of been mine
But a deal to survive like a shadow of the night
Next style is my style surrounded by my kind
(And I will not die)
No matter if they want me to
Broke through the chance that they put me through
And it's true unstoppable aint a motherfucking thing anyone can do
Not saying that I think I'm better
But this shit right here gonna live forever
This legacy me & him built together
Every word that we speak can't fuck with it never
(Never never never)
Depending on the weather
Even if it's sunny skies
And it's gloomy inside
When the world outside
Just don't seem right
But I'm sitting by myself watching it pass by
And I'm thinking about the lies that they told me so
Cause they never had intentions of letting me grow
But they play me like pesticide
With a smile on my face waiting for me to die off slow
(But I will not go)
Never be cold
When it's 20
