Advisory - the following lyrics contain explicit language:

In the name of Satan
We'll achieve our goal
With the blessings of Hades
We'll outlive our role Through the power of Hellfire
We will gather our strength
With the blood of mere mortals
Our thirsts will be quenched In the name of Satan
Great things can be done
Through the lore of the demons
Satan's songs can be sung Gather around my Legions
For in time you will see
Mortals screaming for mercy
At the king for World War III Hail Satanas
In nominai deinochous
Satanas, Lucifer excelsis In the name of Satan
We'll take what we need
Rock 'n' roll damnation
Let your heart bleed Sensing the disaster
So we'll blame our hate
Hell bore Satan's child
To use you as our bait Hear the infernal Legions plead
As Satan sings his songs of war
As I see mortal corpses rise
Up from the depths
I care not for the whore I will destroy the priests
Bound in chains and damned in Hell
I will n'er release his soul Infernal torment brings reign
Spreading demons of night
