

What We Know

Sonic Youth

I'm in a state of shock
I'm creeping up and down your block
I'm looking into you
I'm trying to catch your view It's not a quiet meditation Oh, that you know
Darkness makes the night more cold
That's what we know about me Satisfied wise child
Creeping heart and frozen perfection
You can touch my hand
I drink a case of you Heaven's not about your reputation Yeah, that I know
Forever means the night turns gold
That's what we know about you It's been quite a ride
With you my sweet, here by my side
Funny how the mountains slide
We're stepping across the great divide Our bodies vibrate slowly Yeah, that we know
Bound to give it heart and soul
That's what we know about us
