

Wait

Take That

Oh no, turning into cannibals and everything
That she wants is made out of minerals
I don't know what I done, she only speaks in subliminals
The reception here is lousy and the service is minimal Oh no, I live with an Eskimo, I swallowed
'Cause we become mechanical and hollow
I seem to make you miserable
So take your tiny chemicals 'cause I need a miracle Free your soul to me
Meet me on the corner 'cause the wall's on fire
Words can set us free
Can you make it go away? Make it stop, stop Wait, there's something that I wanna say
Something that we hid away
Something that I'd like to change These words have never left a mouth
We never got to get it out
Communication not allowed
Some things we don't talk about Oh no, I've fallen off a pedestal
And your selected memory is really quite incredible
Tomorrow, when you get forgettable
I'll try being wonderful yet totally inedible Free your soul to me
Meet you there in China, cross the wall of fire
Words can set us free
Can you make it go away? Make it stop, stop Wait, there's something that I wanna say
Something that we hid away
Something that I'd like to change These words have never left a mouth
We never got to get it out
Communication not allowed
Some things we don't talk about Free your soul to me
Free your soul to me
Words can set us free
Can you make it go away? Make it stop, stop Wait, there's something that I wanna say
Something that we hid away
Something that I'd like to change These words have never left a mouth
We never got to get it out
Communication not allowed
Some things we don't talk about
We don't talk about Wait, there's something that I wanna say
Something that we hid away
Something that I'd like to change These words have never left a mouth
We never got to get it out
Communication not allowed

Some things we don't talk about
