

Everything (Between Us)

[Liz Phair](#)

We have everything we need here
We have everything between us
You have nothing left to fear, dear
'Cause it ain't ever gonna leave us We might get a room downtown, now
Get away for a half day
We might drive a car down to the next town
Get away from our family Let your body move real slow
Tell your body we left yesterday
Let your body hold me close
Let your body move you We have everything we need here
We have everything between us
You have nothing left to fear, dear
'Cause it ain't ever gonna leave us Let your body move real slow
Tell your body we left yesterday
Let your body hold me close
Let your body move you Let your body move real slow
Tell your body we left yesterday
Let your body hold me close
Let your body move you Let your body move you
Tell your body we left yesterday
Let your body hold me close
Let your body move you We have everything we need here
We have everything between us
