

The Wolf

Mumford & Sons

Wide-eyed with a heart made full of fright
Your eyes follow like tracers in the night
And the tightrope that you wander everytime
You have been weighed, you have been found wanting
Been wondering for days
How you felt me slip your mind
Leave behind your wanton ways
I want to learn to love in kind
'Cause you were all I ever longed for
Sheltered, you better keep the wolf back from the door
He wanders ever closer every night
And how he waits begging for blood
I promised you everything would be fine
Been wondering for days
How you felt me slip your mind
Leave behind your wanton ways
I want to learn to love in kind
'Cause you were all I ever longed for
Hold my gaze love, you know I want to let it go
We will stare down at the wonder of it all
And I-I will hold you in it and I-I will hold you in it
Been wondering for days
How you felt me slip your mind
Leave behind your wanton ways
I want to look you in the eye
'Cause you were all I ever longed for
Been wondering for days
How you felt me slip your mind
Leave behind your wanton ways
I want to learn to love in kind
'Cause you were all I ever longed for
