

# If You Want It

## Jebediah

Going through these old scrapbooks  
It's where the pasts been laid  
To rest innocence clashes with ambition  
Puts it to the test now It's over and this is where we've arrived  
Most others would just be happy that they'd survived  
'Cos they all want, it they want it  
But they just don't get it now Cutting through all the late night stoned up talk  
Of being blessed sure life's got complicated  
But someday babies must be dressed  
Now, we've been there And this is where we've arrived  
Most others would just be happy that they'd survived  
'Cos they all want it, they want it  
But they just don't get it now
