Gravity

Jason Chen

I'm so lost in love with no rhythm or rhyme
I'm starstruck i'm so stuck with no sense of time
I fall apart when you're gone I think that i need your love
Just pull me right back to start
I don't know what this could be so lost in your mystery
Caught up in your gravity
Don't know how you got such a hold of me
Caught up in your gravity
You know I never want you to set me free
Caught up in your gravity
Caught up in your gravity
Caught up in your gravity
Caught up in your gravity
It's just you, you're all I need to keep my heart tight
When you're here I wouldn't fly away
Oh no, I won't even try
We fall apart when you're gone I think that I need your love
Just pull me right back to start
I don't know what this could be so lost in your mystery
caught up in your gravity
Don't know how you got such a hold of me
Caught up in your gravity
You know I never want you to set me free
Caught up your in gravity
Caught up in your gravity
Caught up in your gravity
Caught up in your gravity
There's no way to stop this attraction
Cause baby your my satisfaction
If you disappear it's like the world will fall but will lose control so never let me go
Never let me go
Not even the flight through the galaxy could ever keep me awake
Caught up in your gravity
Don't know how you got such a hold of me
Caught in your gravity
You know i never want you to set me free
Caught up in your gravity
Caught up in your gravity
Caught up in your gravity

Caught up in your gravity
