

# Where It All Started

## New Edition

Picture this where it all started  
Was back in Boston, Massachusetts some time ago, believe that  
And by reopening the doors to all youth  
A little salt was thrown on me and my boys You know what I'm sayin' but now we're back  
Picking up where we left off  
And through this song, process of elimination will be done  
You better believe that Ronnie, Bobby, Ricky and Mike  
Ronnie, Bobby, Ricky and Mike The beginning of a dream  
Where our ideas were born  
Tell 'em Ricky, to understand what this really means  
Let's set the record straight once and for all and I'll tell you 'Cause other people imitate  
And try their best to recreate  
This is where it all started from  
So they only perpetrate  
But they can never duplicate  
This is where it all started from Yo, it's on you Ron, it's nice to be the original  
That all the counterfeits like to bite off  
We only take it as a compliment  
When they copy some of our material To stay the best among the rest  
We work to keep our movements fresh  
This is where it all started from, you listen up dap  
Instead of being clones  
Why don't you think of something on your own  
This is where it all started from Now there's one more thing we think you should know  
Don't be a victim to the wanna be  
This is where it all started from  
A fake, a fake  
'Cause no other's ever gonna be like us  
This is where it all started from, take that Ronnie, Bobby, Ricky, and Mike  
Ronnie, Bobby, Ricky, and Mike  
We're cool, cool it cool it now  
Let's sweeten it up, candy girl  
Count it off, one, two, one two  
But you better not, better not 'Cause other people imitate  
And try their best to recreate  
This is where it all started from  
So they only perpetrate  
But they can never duplicate  
This is where it all started from To stay the best among the rest

We work to keep our movements fresh  
This is where it all started from  
You listen up dap instead of being clones  
Why don't you think of something on your own  
This is where it all started from Yo wait a minute! Hold up! Wait! Stop! Huh!  
You didn't know we was coming back  
Like this on 'em, my brother
