

People Asking Why

Seal

Why am I changing?

Why do people get complacent with the things they're told? World disasters, they come and go

I'd give anything just to be back home

'Cause there are people askin' why

There are people who believe in life, gets confusing but I don't know why

But I've made my plans already, had this trouble with it all my life Well world disasters, they come and go

I'd give all my strength to be back home

'Cause there are people askin' why

There are people askin' How do I get to where I've come from, now?

How will I paint this garden I've destroyed, green?

Can I get back to where I've come from?

'Cause there are people who believe in life Well how do we get to where we come from?

Peace and love ain't enough these days

Evolution says, "Time is running out, we've been here too long"

'Cause there are people askin' why, ohh there are people askin' How do I get to where I've come from, now?

How will I paint this garden I've destroyed, green?

Can I get back to where I come from?

'Cause there are people who believe it How do I get to where I've come from, now?

How do I paint this garden I've destroyed, green?

Can I get back to where I've come from?

'Cause there are people who believe it How do I get to where I've come from, now?

How will I paint this garden Ive destroyed, green?

Can I get back to where I've come from?

'Cause there are people who believe it How do I get back to where I've come from, now?
