

Forever And A Day (CDQ) (2010) [www.RnB4U.in]

Kelly Rowland

Verse 1:

I can feel when you're happy
When you're near me, every heart beats
Making me feel, like it's magic and we have it, when it happens
Bridge:
I wanna scream your name, out to the sky, let it shine with the stars
Now that you lit the flame don't let it die, just let it burn
Chorus:
Forever and a day, baby, that's what I want when I'm with you
You'll never go away, baby, no one can do me like you do
Forever and a day, that's how long I'll be loving you
You'll never go away, I will search this whole world for you
Verse 2:

How could something, come between us?

When it's nothing that can mean as much

And you whisper that you love me

While were dancing I lose gravity.
Bridge:

I wanna scream your name, out to the sky, let it shine with the stars

Now that you lit the flame 't let it die, just let it burn

Nooooo
Chorus:

Forever and a day, baby, 's what I want when 'm with you (when 'm with you)

I'll never go away, baby, no one can do me like you do (Can do, me like you do)

Forever and a day, 's how long 'll be loving you

I'll never go away, I will search this whole world for you
Vamp:

I can search a lifetime and I'd find

Someone special that I could call mine

There to have you

Always want you around me forever,

Forever and A Day
Forever and A Day
Chorus:

Forever and a day, baby, 's what I want when 'm with you

'll never go away, baby, no one can do me like you do (No one can make me feel)

Forever and a day, 's how long 'll be loving you

'll never go away, I will search this whole world for you
Vamp:

I can search a lifetime and I'd find

Someone special that I could call mine

There to have you

Always want you around me forever,

Forever and A Day
