

# Ketamine And Ecstasy

## Clap Your Hands Say Yeah

Ketamine and ecstasy  
Your words are hanging in the trees  
A whole university just rises  
Don't ask to sooth me (?)  
Death and muted  
Seems that I would have to do  
Me trying to hold on to you  
And you trying not to put up a fight  
Have I become a stranger to this country?  
Was I ever even in any country at all?  
I want you what you want out of this  
You can be sure  
Here comes the rain again  
To wash away what we had  
Well find yourself a substitute

To loose the dogs upon the shoot  
You say the car can steer itself tonight  
Running around as the nightmare clouds  
Are bare (?) enough till I will cry  
As anyone can see we're meant to be  
Well we don't really belong  
Have I become a stranger to this country?  
Was there ever even any country at all?  
I want what you want out of this  
You can be sure  
I want what you want out of this  
You can be sure  
I want what you want out of this  
You can be sure  
Here comes the rain again  
To wash away what we have ' run (?)
