

# In the City (Rail)

## Wiretree

You're always walking all around in the city  
All the head are turnin round cause you're pretty  
lookin for a fun time  
Always in sunshine  
Waiting on the corner, at the stop for the CTA

All the days are ending up all right  
you're going out on a saturday night  
You're searching for the right time always in the night time  
listening to the sounds of the people on the radio

And the feeling isn't gone but you know that your strong  
feeling all around and you that you cant go on

donâ€™t let your life get driven by fear  
You want to leave but then you're already here  
Always under pressure  
Then you try to measure  
All the things you want but you're never very clear

And feeling isn't gone but you know that you're strong  
feeling all around and you that you can't go wrong  
And feeling isn't gone but you know that you're strong  
feeling all around and you that you can't go wrong

And the midnight is coming your way  
all the reasons why you wanted stay  
There's nothing like the right time  
searching for the redline  
listening to the people and the sounds of some might say

And feeling isn't gone but you know that you're strong  
feeling all around and you that you can't go wrong  
And feeling isn't gone but you know that you're strong  
feeling all around and you that you can't go wrong
