

Easy

Westkust

The winter wind against my skin is tearing me
And it's been some years but you are me and I am you
I try avoiding all the places you might go
Don't want to see you having fun
I'm tired seeking something that I might want
You told me I was the only one
I don't believe someone like me changes you
A skin deep touch is not that much but it's all we need
You never know what to say
You always told me this was going to be easy
You said it was easy
Your pitch black eyes are shimmering with anguish
and summer calls my heart is still in the distance
I try avoiding all the places you might go
Don't want to see you having fun
I'm tired seeking something that I might want
You told me I was the only one
I don't believe someone like me changes you
A skin deep touch is not that much but it's all we need
You never know what to say
You always told me this was going to be easy
You said it was easy
