Dark Matter

The Universe

Inside the vehicle, the cold is extreme Smoke in my throat kicks me out of my dream I try to relax but it's warmer outside I fail to connect, it's a tragic divideThis has become a full time career To die young would take only 21 years Gun down a school or blow up a car The media circus will make you a starCrushed like a rose In the river flow I am, I know I am, I knowDark matter flowing out on to a tape Is only as loud as the silence it breaks Most things decay in a matter of days The product is sold, the memory fadesCrushed like a rose In the river flow I am, I know I am, I know
