

# Nation of Slaves

Joseph Arthur

We live in a time where we're all gonna fall apart  
and chemicals rising up over the sun  
A nuclear mind evolution of human heart  
Is the creation we're gonna become Nation of slaves, we all say that  
I can't find my way without following you  
And I can't find my way without following you  
And I can't find my way without following you  
And I can't find my way without following you  
And I can't...Burned by the sun  
Burned by the sun  
Burned by the sun  
Burned by the sun We live in a time where we get fed the same idea  
Like junkies addicted to information  
and ya go to a new place and you never get anywhere  
and I already finished before you begun Nation of slaves, we all say that  
I can't find my way without following you  
And I can't find my way without following you  
And I can't find my way without following you  
And I can't find my way without following you  
And I can't find my way without following you  
And I can't...Burned by the sun  
Burned by the sun  
Burned by the sun  
Burned by the sun Can't find my way without following you  
And I can't find my way without following you  
And I can't find my way without following you  
And I can't find my way without following you  
And I can't find my way without following you.....
