The Other Side

Nina Sky

Where'd you come from, Where have you been,
Like a ghost I felt your presence,
When you talk, it's a different energy,
Brand new boy I dont get it.
Like you're of a different kind,
And you've lived a different life,
So lets take a trip tonight,
Take me to the otherside.
Take take take take take take take take me away... The Otherside
Take take take take take take take take me away... The Otherside
Let's explore the universe,
be the leader and I will follow,
Cause I always wished upon a star and finally there I'll travel.

This must be the after life,
Never thought I'd see the sky,
So let's take a trip tonight,
Take me to the otherside.
Take take take take take take take take me away... The Otherside
Take take take take take take take take me away... The Otherside
Be the first couple on the moon,
take a walk through the stars,
let's explore Venus hold hands on Mars,
Hold hands on Mars... Hold hands.
Take take take take take take take take me away... The Otherside
Take take take take take take take take me away... The Otherside
