

# The World

## Punchline

By your look should I have something to say?  
Well the question wasn't that in a day and  
I took some time to mess up my life and  
Its almost perfect let me get this right  
We were different added together and Congratulations I guess you're always right  
Well I'm sorry that I ever tried  
What happened to the world we knew?  
We were so much better than  
This~?!. Memories destroyed by disease  
And they're buried under letters full of words  
You never meant to say  
The reaction was greater than the screen  
We were the difference added together and Congratulations I guess you're always right  
Well I'm sorry that I ever tried  
What happened to the world we knew?  
We were so much better than this I didn't feel like this the whole time  
But it didn't help when you made your predictions, yeah  
We crossed this bridge, crossed it sometime ago  
But I didn't know, I didn't know you would move on Congratulations I guess you're always right  
Well I'm sorry that I ever tried  
What happened to the world we knew?  
We were so much better than this  
So much better than Congratulations I guess you're always right (you're always right)  
Well I'm sorry that I ever tried  
What happened to the world we knew?  
We were so much better than this  
So much better than this (this)  
So much better than this
