

One Summer

[Daryl Braithwaite](#)

Started out last night, I was thinkin' of days gone by
Of the times I've had, And the things that I've left behind
Some change, some die, Still we manage to survive
It's knowin' when and what to do, It's up to you
Don't know what's goin' on, I can't wait 'til One summer, I'll find a way
One summer, will always remain
One summer, remember the way Hauled down, turned around, Find myself facin' the wall
I think back to school, it's all the same, slightly different rules
Outside on your own, Watch yourself 'cause you're all alone
I know what's going on, I can't wait 'til One summer, I'll find a way
One summer, will always remain
One summer, remember the way
One summer, never the same Oh-oh-oh-oh-oh
I think back not far, Drivin' down the beach in my car
Another place same time, Lucky runs along a fine line
Down there, no chance, He's trapped in a different romance
He's life a fait accompli, He never did see One summer, I'll find a way
One summer, will always remain
One summer, remember the way
One summer, never the same One summer, I'll find a way
One summer, will always remain
One summer, remember the way
One summer, I'll find a way
One summer, will always remain (fade)
