Courage (feat. Tree Giants)

Social Club Misfits

I wouldn't say it's over, played to slow down, slow down.
You found your place in the mystery when you said to me,
I finally begun to see what I'm meant to become.
When I fall, when I won't let go, when I find I'm standing in the fog, standing in the fog.

Everything's fine or pretend to be
Let's get lost on an empty street
Let's go away and never come back here
I fell in love, I was not prepared
I'm not as pretty as the populars
Talked all night on the bottom stairs
We spoke about things only God would hear
Don't forget us why you're here
Escape this place that was all our prayers
Only come back on the holidays
We don't the chase girls who got away
I got a ways to go but I'm not too far away
Not too far away
That's what I told my girl, I'm gone today
When I see my family then it's all okay
Bow our heads lift your hands and pray
Thank God for another day

Hold your head up
Living it up, aren't you gonna give it up,
It's love that gave it anyway. It's hard to give it all away. So swallow the courage.
Living it up, aren't you gonna give it up,
It's love that gave it all away. It's love to give it anyway. So swallow the courage.

In my life time, I've been out of my right mind.
With nothing left no lifelines just wishful thinking in my rhymes.
And my kids is soaring, how time flies.
My eyesight set way past the sky because I probably been on 10,000 flights and the first 5,000 I was terrified.
When you know God's real, you settle down.
This song is nothing but motivation in a time where real is a dying breed.
Though there ain't none, me I want unity.
Everybody knows, ain't no I in team.
From now on we all shine like diamond rings and we won't stop till the whole world sings this song about hope and the love God brings.

I told them the plans always been unify.
We all fall short is just you and God.
To me this song is more than lines because I could've died like four times, but I didn't so I know there's a plan.
Difference is this time took the Lord by the hands.
Deviate no man, not part of the program.
Now please all stand and tell them we all can.

I found the courage when I left love there in the stars
I'm coming back into the power alone, it's been a roller coaster
