Every Word

Tish Hinojosa

Every word ever said
Deep in love doesn't end
We've been there it was then
That we knew it beganI feel my world unfolding
In colors when you hold me
And I believe in every word againTime's a tale waiting by
Memories tell me why
Every road, twist and trial
Baby's breath, midnight sighI feel my world unfolding
In colors when you hold me
And I believe in every word againI feel my world unfolding
In colors when you hold me
And I believe in every word in you and me
And songs of love
And I believe in every word again, again
