

# Eroded Liberty

## Nuclear Assault

Welcome to the age of an american empire  
Not a day will pass when bombs don't seem to fly  
Scream about the rights of victims and their pain  
But your actions are where the causes lay  
Don't like what we have done - we're not the only ones  
before you raise your rage - look closely at your past  
Algeria and Viet Nam - Africa the Middle East  
English ships and the slave trade - now tell me who's the beast  
European leaders wringing their own hands  
Set aside as powers in the holy land  
To Europe we are lacking in sophistication  
Are we another shitty little country  
Don't like we have done - we're not the only ones  
Before you raise your rage - look closely at your past  
South East Asia and India  
Aztec Mayan and Incan worlds  
Chinese hooked on opium  
Sacrificed for the old world ways  
Belief in their empire covers them in cloth  
Forget their powers and morals for the part  
History shows us this has always been our harm  
When we put up with this and the UN in charge  
Don't like we have done - we're not the only ones  
Before you raise your rage - look closely at your past  
America your enemy  
To heal your leaders tell  
But for your own demands  
You need our power as well
