To the Stars

Modestep | www.AudioCastle.net

Now that you've gone to the stars
Now that the storm has finally come
So now that you've gone to the stars
Now that the storm has finally comeWhen these colors fade to gray,
You're a million miles away.
When these colors fade to gray,
You're a million miles away.
When these colors fade to gray,
You're a million miles away.
When these colors fade to gray...Now that you've gone to the stars
Now that the storm has finally comeSo now that you've gone to the stars
Now that the storm has finally come
So now that you've gone to the stars
Now that the storm has finally come
So now that you've gone to the stars
Now that the storm has finally comeWhen these colors fade to gray,
You're a million miles away.
When these colors fade to gray,
You're a million miles away.
When these colors fade to gray,
You're a million miles away.
When these colors fade to gray...So now that you've gone to the stars
Now that the storm has finally come
So now that you've gone to the stars
Now that the storm has finally comeNow that you've gone...
