When Everything Was What It Was

The Belle Brigade

I don't wanna move on
But I don't wanna stay here
And if my life is a line
All I see are the angles
And there's a fence around my yardDon't wanna go back in time
And I'm afraid of the future
Just wish everything worked
How I imagine it used toWhen you were happy just because
When you were angry just because
When everything was what it wasWhen everything was what it was
When everything was what it was
When everything was what it wasSo if you're readin' my palm
And you can see where I'm going
You could be right or wrong
For me it's better not knowingCuz' I'll be thinking way too much
And it'll never be enough
Yeah I'm avoiding it becauseWhen everything was what it was
When everything was what it was
When everything was what it wasThere's nothing worse than catching yourself in a lie
But then again the truth can take your lifeWhen everything was what it was
When everything was what it was
When everything was what it wasWish everything was what it was
Wish everything was what it was
Wish everything was what it was
