

Love Comes Tumbling Down

[Matt Nathanson](#)

You tried to keep me warm
I was falling through the sky
You whispered to me
Baby hold on tight

No starting wars
Saying my good-byes
Still you never took your hand from mine

All the stars above our heads
The faster they came
The faster they went
All the stars above our heads

Spin you round through the roar of this crowd tonight, tonight
I'll dance you round through the bones of this town
Until daylight comes
Hope, hope will put the colors in the sky
Hope, hope will set this world of wrong to right, to right
Love comes tumbling down

Cities made of stone
Sinking in the flood
All the people wait around to rust

All the stars above our heads
The faster they came
The faster they went
All the stars we lose ourselves

Spin you round through the roar of this crowd tonight, tonight
I'll dance you round through the bones of this town until daylight comes
Hope, hope will put the colors in the sky
Hope, hope will set this world of wrong to right, to right
Love comes tumbling down

When did we, when did we get so careful (oh love)
When did we, when did we lose ourselves
Afraid, we fade, we fade out

When did we, when did we get so careful (love)

Spin you round through the roar of this crowd tonight,

Tonight (spin your round)

I'll dance you round through

The bones of this town until daylight comes (dance around)

Hope, hope will put the colors in the sky

Hope, hope will set this world of wrong to right,

To right (then love comes)

Love comes tumbling down

(love, love) love comes tumbling down

All the stars above my head

The faster they came

The faster they went
