

# Flower of Life (Radio Edit)

Dorje

Sleep tonight  
bury all your fears tonight  
carrying the flower of life  
this precious gift our to deny

Why do you haunt me  
when you know I'm pacified  
taste the flame that burns me  
precious tears I cry

I will vow  
to anyone  
no one  
under the burning sun

I will vow  
to anyone  
no one  
under the burning sun

Stalking the wasteland  
twisted dark sand  
the stygian crow speaks  
blood on it's beak  
faster than the dream  
of running water  
down the river to the sea  
freeze me  
freeze me

I will vow  
to anyone  
no one  
under the burning sun

I will vow  
to anyone  
no one

Take life

to bring new life

Take life  
to bring new life

Take life  
to bring new life
