Future This

The Big Pink

Believe in love
Call it off[?]
The time will come
To give all we lostFuture this extend your range
Stand up and then change your name
Choose your fix when attraction's gone
Make your mark when water's run
Hidden ants in a vocal sun[?]
Girls in soft explosion
Head out in the gold crush
Feel the warmth and you'll know it's usTime will come
To give all we lostI see now what your body's known
All hearts break when the light is faded
Love runs faster than time
I see now what your body's known
All you wanted was what I needed
Love runs faster than timeVoices play [?]
22 eyes stare back at me
Luminate an astroplane
Send us back from where we came
[?] float in front of me
Like purple leaves on golden trees
Bend this and look the through the frame
Crooked hook in a concrete waveBelieve in love
Call it off[?]
Time will come
To give all we lostI see now what your body's known
All hearts break when the light is faded
Love runs faster than time
I see now what your body's known
All you wanted was what I needed
Love runs faster than time
