

You Are, You Are

October Drift

I'm not here
And you're not too
We've fallen through

I'm so cold
And your so blue
We've fallen through

I'm on the other side
I'll take you with me
We don't need the world anymore

I'm on the other side
I'm still alive
Now I can see straight through it all

I'm still cold
Watch me now
Laying on the ground

Throw away
all we've found
Laying in the ground

I'm on the other side
I'll take you with me
We don't need the world anymore

I'm on the other side
I'm still alive
Now I can see straight through it all
