The Cure

Mae

I've grown so tired
Of running circles around myself in search for something new
Only when I stood still
I could see you were there and you were waiting for me to fall in love with you
But I swear
Just on principle
With you near
I feel like I'm invincible
All that I've wanted is standing in front of me
All that I'll need - that's for sure
You came to my bed when I was sick
And you brought me your cure
Once I was frail
Now I have been repaired in all the lovely things you do
You do 'em so well
Come my dear
Let me hold you and soak in the love that we make cause it's right en queue
I rest

In our citadel
At our best
Our love is so incredible
All that I've wanted is standing in front of me
All that I'll need that's for sure
You came into my room when I was sick
And you brought me the cure
I was under the weather
But now I've pulled it together
So let me do what it takes to take care of you
All that I've wanted is standing in front of me
All that I'll need, that's for sure
You came into my room when I was sick
And you made me yours
All you could need and expect,
It will come from me
No one could ever love you more
You're in my world for good
And our love will always be the cure
