

# Where There Is Love

**Jane Olivor**

we have old friends, some are memories  
and they come at tap us on the shoulder  
and they take us to the places that we miss and remember with a smile -

we go where there is love whenever we are lonely  
and going back we find enough love stayed behind to make us feel at home.

i can almost feel you touch me! even now, remembering makes me tremble!  
if i'm feeling all the old fire, seems to me that you can't be far away!

when the cold winds are blowin' and there's no one here to hold  
this memory will take me and keep from the cold!

we go where there is love whenever we are lonely  
and going back we find enough love stayed behind to make us feel at home.
