

# Making Love

## Never Shout Never

I know your love is true  
It's not just sex for you  
It's the first time that I felt this way in a long time  
And it's something I could get used to  
It's love, it's love, it's true  
When I'm making love to you  
It's not just teenage lust  
Or trying something new it's love,  
But we're too young to follow through  
Her heart is made of gold  
These past two years  
I've grown so cold  
At the thought of trying out a different lover  
Now I know, I could never love another

It's love, it's love, it's true  
When I'm making love to you  
It's not just teenage lust  
Or trying something new it's love,  
But we're too young to follow through  
With all the plans we made  
Travel all the world  
And drink our cares away  
What a happy day, if only I could say  
That she would be my lover, from now until forever  
It's love, it's love, it's true  
When I'm making love to you  
It's not just teenage lust  
Or trying something new it's love,  
But we're too young to follow through
