

Into the Woods

My Morning Jacket

A kitten on fire, a baby in a blender
Both sound as sweet as a night of surrender
I know it ain't easy but you do what you can
If your livin' gets wheezy, you can follow this plan
Put in more than you could ever get out
I'm tired of the talking, I know what you're about
Now open your mouth, here comes the spoon
You're gonna eat what I give ya and you're gonna like it real good
I went over the river and into the woods,
where did I go?
Where a wood burning stream, flows up through the trees
Like the soul of the hottest kind of lover, I've ever seen
One who lives to choose another fool's dream
A good shower head and my right hand
The two best lovers that I ever had
Now if you find you agree with what I just said
You'd better find a new love and let 'em into your head
