

Device Control

Frank Ocean

[Intro]

With this Apple appliance, you can capture live videos
Still motion pictures shot at high frequency
Blurring, blurring the line[Chorus]

With this Apple appliance, you can capture live videos
Still motion pictures shot at high frequency
Blurring, blurring the line between still and motion

With this Apple device
You can blur the border between still and motion pictures
You can blur the border between still and motion pictures[Verse]

With this Sony Telephone 4K video is in your palm
It is in your palm, in your palm
In your hand, in your hand
With your eyes, with your eyes
You can capture real 4K

With this Samsung telephone, we don't call it telephone
I think I saw billboards describing life interactivity
Life sharing, live posting, streaming off your videos
The new Samsung Galaxy allows you to livestream your life
Livestream your life, livestream your life

You can blur the border between still and motion pictures
You can still stream you life
Your life can be streamed
In endless communication
We all show interest in every body's life
Your life can be streamed
Life, your life can be streamed
Life, life[Chorus]

You can blur the border between still and motion pictures
You can blur the border between still and motion pictures
You can blur the border between still and motion pictures

You can blur the border
With this device, the border between still and motion pictures is absolutely blurred
