Faith (Album Version)

Goldfinger

I ask myself
Where has passion gone? Have I grown up?
Am I too old?
I don't feel like I didI need to feel, there's nothing else
Nothing left but your taste in my mind
Where have I gone?
Where have I gone?You come along to sing this song
Restore my faith like nothing's wrong
You come along to sing this song
Restore my faith like nothing's wrongBut I'm
Singing this songI feel sick
I need more than this
Where have I gone?
Where have I gone?What shuts me down, tears me apart?
I don't know what I am
Where's the man, the man with dreams? One man alone
I haven't changed a thingYou come along to sing this song
Restore my faith like nothing's wrong
You come along to sing this song
Restore my faith like nothing's wrongYou come along to sing this song
Restore my faith like nothing's wrong
You come along to sing this song
Restore my faith like nothing's wrongBut I'm
Singing this song
