Black River

Sierra Hull

I'd like to say to you come follow
But I'm afraid my heart may hollow here
And though it seems the water is shallow
It's over my head, but still I swallowA black river runs down my face
I guess now is not the time or placeThe clock is slowly sinking
It doesn't matter what you're thinking anymore
And for a while I tried pleasing you
But now I'm left with no good reason toA black river runs down my face
I guess now is not the time or place
A thousand years is but a day, they say
And maybe in a thousand more I will find my wayA black river runs down my face
I guess now is not the time or place
A thousand years is but a day, they say
And maybe in a thousand more I will find my wayA thousand years is but a day
And maybe in a thousand more I will find my wayI'd like to say to you, come follow
