

# Black River

Sierra Hull

I'd like to say to you come follow  
But I'm afraid my heart may hollow here  
And though it seems the water is shallow  
It's over my head, but still I swallow A black river runs down my face  
I guess now is not the time or place The clock is slowly sinking  
It doesn't matter what you're thinking anymore  
And for a while I tried pleasing you  
But now I'm left with no good reason to A black river runs down my face  
I guess now is not the time or place  
A thousand years is but a day, they say  
And maybe in a thousand more I will find my way A black river runs down my face  
I guess now is not the time or place  
A thousand years is but a day, they say  
And maybe in a thousand more I will find my way A thousand years is but a day  
And maybe in a thousand more I will find my way I'd like to say to you, come follow
